

“ Math Focus, Fun Focus.

The Ultimate Online Math Practice you'll love. ”

1 Array of Quality Math Content.

35,000 math problems covering 91 topics all aligned with NTCM standards.

Downloadable study guides for each topic complemented by descriptive solutions and animated visual aids. All aimed to help your child build solid foundations in **Numbers**, **Measures**, **Shapes and Space**, **Data Handling** and **Algebra**.

2 Online Exercise that Adapts to Your Child.

Learning math is now more personalized than ever because we can track your child's strengths and weaknesses in different topics and choose the right materials for him/her.

We accelerate your child's learning pace in stronger areas, while encourage them to do more work in weaker topics. This personalized progression helps your child to advance independently and put study time into good use.

3 Motivated Self-Learning.

PLANETii balances the fun element with exercises to makes math practice an enjoyable experience. Starting from our special characters and user friendly interface, we reward students with badges, certificates and web leaderboards.

91 Math Topics from Grade 1 to Grade 6 Curriculum.

5 Dimensions in math.

Numbers

Measures

Shapes and Space

Data Handling

Introducing SmartMath Practice: The world's most advanced math practice system.

CHILD

A little practice everyday goes a long way in mathematics. We make it easy and enjoyable for your child.

- ➔ **MathWorld Core**
Library of quality math practice questions
- ➔ **Explore It!**
Explore math concepts with our interactive manipulatives
- ➔ **My Badges**
Track your achievements by topic and print certificates
- ➔ **My Points & Leaderboard**
Monthly leaderboards to encourage self-learning

PARENT

Stay informed about your child's progress at the convenience of a click. The more you know, the more you stay involved.

- ➔ **Calendar View**
Detailed account of your child's login information
- ➔ **Report Card**
View how your child is doing on each subject
- ➔ **Curriculum View**
Track your child's progress according to our curriculum
- ➔ **Worldwide Compare!**
Compare your child's progress with other users
- ➔ **Send Messages**
Send your child words of encouragement and feedback on their progress

Practice for Exams!

Our wealth of critical thinking and higher level questions help improve your child's skills in different areas: numerical, word problem, logical reasoning, and concept application.

Practice all you need.

Pick the relevant topics and practice what your child has learnt from math class everyday. 15 to 30 minutes a day is all you need.

Practice wisely.

Our computer system keeps track of your child's strengths and weaknesses in each of the math topics. It also encourages them to work on areas where they need improvement.
